

ADRIAN NADEAU

SENIOR APPLICATION ARCHITECT

Outstanding, talented Senior Application Architect with 15+ years of development in multiple programming languages, while providing end to end solution designs and architect experience. Passionate learner focusing on solution design and customer user experience.

Proven leader with experience in corporate and smaller cultures that enjoys working with people to design and implement quality solutions while using technologies and developing systems that ensure customer satisfaction.

WORK HISTORY

SENIOR APPLICATION ARCHITECT , 03/2016 to Present

Computer Generated Solutions / Bell Aliant, Saint John, New Brunswick

- Collaborated with cross-functional development team members to analyze potential system solutions based on evolving requirements.
- Directed Enterprise software design and development across 6 member development team.
- Consulted with development staff to evaluate software requirements for new and older solutions.
- Researched, designed and implemented scalable applications for information identification, extraction, analysis, retrieval and indexing.
- Led Java and .NET development initiative as Subject Matter Expert and primary point-of-contact for project management staff.
- Prepared detailed weekly reports on updates to project specifications, progress, identified conflicts and team activities.
- Investigated new and emerging software applications to design, select, implement and use administrative information systems effectively.

SENIOR PROGRAMMER ANALYST/TEAM LEAD, 10/2010 to 03/2016

J.D. Irving, Limited , Saint John, New Brunswick

- Researched, designed and implemented scalable applications for information identification, extraction, analysis, retrieval and indexing.
- Strengthened developmental methodologies by introducing Agile Framework for 80% of software development.
- Stress-tested server code to validate code changes.
- Evaluated multiple software solutions during early software architecture plotting and system migration planning stage.
- Selected to mentor Junior Developers.

Application Experience:

• Enterprise Reporting / Dashboard:

Led team to create Enterprise Dashboard for Jim Irving. Designed and Integrated with backend applications to pull real-time data to mobile devices for constant updates on 10 JDI applications to report results from anywhere at anytime.

• Sawmill Mills Design & Build:

Designed re-write of 20 year old software. Led team of 5 developers to complete project. Consisted of a new mobile app and integration of 3rd party applications

• Telegraph Journal Online Initiative:

Responsible for leading team development, while working with 3rd part software team to complete integrated software with print solution for 1 end-to-end solution.

OWNER , 09/2000 to 06/2010

Evolving Solutions, Saint John, New Brunswick

- Charted and executed marketing strategies to gain new clients.
- Managed day-to-day business operations, including accounting, finance, HR, marketing and public relations.
- Assessed financial reports and statements regularly to update processes and operations for greater profitability.
- Maintained consistent work levels by establishing large customer base and continuous pipeline of deliveries.

Application Experience:

• YourTeamOnline:

• Created online sports application for hockey coaches and teams. End-to-end MVC solution (JSP, JavaMiddleware, MySQL). Coaches could create practice plans easily using the system. Managers could report updates and enter team stats.

• **OfficeGateway:** Designed and developed portal using liferay.com. Led team of 3 developers to customize portlets to include within the open source Liferay platform.

• **Custom Content Management System:** Led and assisted in developing custom Java MVC solution for CMS. Designed initial base requirements, while integrating custom modules that could be added for any of the 200 clients running on the system.
